

A Level Chemistry

Assessment Papers	Topics	Assessment Style
Paper 1: 90 minute paper	See below	short answer question styles (structured questions, problem solving, calculations, practical) and extended response questions.
Paper 2: 90 minute paper	See below	short answer question styles (structured questions, problem solving, calculations, practical) and extended response questions.
<p>The Internal Assessment Papers will only cover aspects of the course that have been studied up to 1st April 2021.</p> <p>In addition, students will not need to revise Colours by design (Topic 10) to avoid some students being disadvantaged during lockdown.</p> <p>The questions will be OCR B Salters Chemistry questions, with a style familiar to those students are used to. All types of question, including calculations, should be expected.</p> <p>What can students do next?</p> <p>Lessons are prioritising revision, and students can contact teachers in advance to request that certain areas of the course are revisited over others. By accessing all resources provided by staff, and completing them fully, students will be able to request support when encountering difficulty. Reviewing previous homework and assessments on given topics, to remind themselves of style and content of questions, and accessing past papers from the board website will all be of value.</p>
